

## Enterprise Edition Version 1.10.0 Release Notes

### Introduction

This document outlines the changes in Enterprise Edition version 1.10.0 release. For the latest information about product updates, tips, and techniques, visit the Scholastic Education Product Support website at [www.scholastic.com/productsupport](http://www.scholastic.com/productsupport).

### New Features and Enhancements

- **Updated Operating System Support**

Windows 7, Mac OS X 10.6.x, Novell SLES 32 bit, QuickTime 7.x, AIR 1.5.x, and AIR 2.x are now certified for Enterprise Edition programs. For more information, see the [Enterprise Edition Version 1.10.0 System Requirements](#) at the [Education Product Support](#) website.

- **Browser Clients**

All SAM users now access SAM Client software through a browser. This eliminates the need for installing client software on teacher workstations. See the [Installation Guides](#) at the [Education Product Support](#) website for more information. *FASTT Math* and *Scholastic Math Inventory* also have browser-based client programs.

- **Improved SAM Database Maintenance Tools**

New tools, including a database cleanup utility, provide better data management capabilities.

- **Simpler Password Requirements**

Default password requirements now require six characters, of which one must be a numeral.

- **New *rSkills* Tests**

New *rSkills* Tests have been added that fully support the new *READ 180 rBook* Flex II for Stage C.

- **A More Targeted *System 44* Fast-Track Assessment**

This allows students to Fast Track while working in a series, skipping over individual topics if they pass the assessment test.

## Updates

The following issues have been addressed in Enterprise Edition version 1.10.0.

### Scholastic Achievement Manager (SAM):

- **SAM Installer Prevents Multiple SAM Connect Agents From Being Activated**

The SAM Connect Agent is no longer installed if the same version of SAM is reinstalled over a previous version. This prevents the SAM Server from having multiple agents running in the background at the same time.

- **Default SAM Timeout Value Increased**

The timeout is now 25 seconds. This will keep the SAM Client program from timing out when hosted customers with limited bandwidth attempt to log in.

### READ 180:

- **The \*.csv Export Shows the Same Number of Total Sessions as the Reading Progress Report**

There is no longer a discrepancy in the number of total sessions between the Reading Progress Report and the \*.csv Export.

### rSkills Tests:

- **Concurrent Usage Increased**

rSkills Tests now supports up to 750 concurrent users.

- **Formatting and Display Issues Addressed**

Display issues and formatting inconsistencies have been resolved.

### ReadAbout:

- **Error Messages Removed From ReadAbout Reading Zone**

ReadAbout Reading Zone area no longer displays "Missing Audio" error messages.

**Scholastic Reading Counts! (SRC!):**

- **SRC! Quiz Manager Reports Capacity Increased**

SRC! Quiz Manager Reports will now generate regardless of the number of quizzes installed.

- **SRC! Book Expert Will Install in Version 1.10.0**

SRC! version 1.10.0 includes the Book Expert when installed as part of a clean installation.

- **Users May Now Modify Restricted Quizzes at the District or School Level**

Previously, when users attempted to modify restricted quizzes at the district or school level, they received a “Page Will Not Load” error message. This message no longer appears.

**Scholastic Reading Inventory (SRI):**

- **Inappropriate Titles Removed From SRI Recommended Reading Report**

Books with inappropriate content have been removed from the SRI Recommended Reading Report for students in lower grades.

- **Server Error Messages Removed From SRI Demographic Reports**

Users no longer see a server error message when attempting to run the Demographic Results Summary Report or Demographic Growth Report in SRI.

- **SRI Proficiency Bands Now Correctly Display Grade K**

Proficiency bands no longer display row and column values for Grade K as Grade Zero (or not at all).

- **SRI Onscreen Proficiency Ranges Now Consistent with Ranges in PDF Reports**

Proficiency ranges in SRI printed reports are now consistent with the ranges in SRI Advanced Settings.
