	THE NUMBER SYSTEM					
	Know that there are numbers that are not rational, and approximate them by rational numbers.					
8.NS 1.	Know that number s that are not rational are called irrational. Under stand informally that every number has a	Devel op Conceptual Under standing:	SE: 13, 14, 19, 20			
	decimal expansion; for rational numbers show that the decimal expansion repeats eventually, and convert a decimal expansion, which repeats eventually into a rational number.	SE: 7, 8, 9, 10, 11, 15, 16, 17 TE: 7, 8, 9, 10, 11, 15,	TE: 13, 14, 19, 20			
		16, 17 Fluency: SE: 11, 12,				

¹ These standards were originally produced by the Common Core State Standards Initiative, a state-led effort coordinated by the National Governors Association Center for Best Practices and the Council of Chief State School Officers. California additions were made by the State Board of Education when it adopted the Common Core on August 2, 2010 and modified pursuant to Senate Bill 1200 located at http://tinyurl.com/CASB1200 on January 16, 2013. Additions are marked in bold and underlined.
