

Math in Focus Placement Tests

The *Math in Focus* placement tests cover the material taught leading up to and within the level indicated on each test. You might also use them as exit tests for each level. They are not timed tests. They should take about an hour to complete, but allow for more time as needed.

A score of 80% or higher on a test indicates that the student probably has the skills to go on to the next level. If a student consistently misses problems of a particular topic, this is an indicator that the student lacks skills in that area. In this case, we suggest that you start at the tested level, regardless of the overall score.
