Saxon Teacher Algebra 2 (3rd Edition) Corrections

Lesson 40
#19. The teacher incorrectly states that 28 divided by 1.4 is 10. She goes on to correct the problem in writing but not verbally.

Lesson 42
Example 3. In steps 2 and 3, the number in the denominator should be 1 x 10^{-19}, not 1 x 10^{-18}. The final answer is correct.

Lesson 63
Example 1. The final answer should be -16R – 13.2U, not 16R – 13.2U. The teacher leaves off the negative sign but correctly interprets the direction as west.
