

# LAGO'S FIVE

Meet Lago, a Super Scholar you will want to know, because he:

**1**

## **Is Persistent**

Lago can work on challenges in fluid ways, like swimming through water. Even when he's faced with hard work, he persists, pushing through to success.

**2**

## **Faces his Fears**

Lago learned that he needs to face his fears. If something challenging or new causes him to worry, he pushes through and keeps practicing.

**3**

## **Sets Goals**

Lago takes small steps toward his goals, checking with his teacher on progress and celebrating when he reaches a goal.

**4**

## **Practices**

Lago never thinks he can be good at something on the first try. He practices often, both during and after school, to get better.

**5**

## **Learns From his Mistakes**

Lago celebrates his mistakes, because he knows they are opportunities to learn. He uses his mistakes to figure out what went wrong, and tries again.

## **Always keep in mind that your work is super work!**

Your work has value for you and for others! Staying focused on your super learning journey means you'll be inspired, curious, and always growing better at what you practice.
