Live Online Course Modules
Selection Guide

HMH's Live Online Course modules allow you to design flexible and ongoing professional learning courses aligned to your instructional initiatives. A Live Online Course consists of six, 1-hour modules for up to 35 participants that can be delivered over time and an additional one-hour consultative planning session. Use this guide to select modules that meet your district, school, and teacher needs.

Select a series or individual modules to build courses as part of your professional learning plan!

*Click **here** to read the description and objectives of each module.*

Live Online Course Series

A series is a collection of 1-hour modules carefully curated to address specific topics to help you meet your instructional goals.

Teaching Children to Read (K-3)	Developing Engaged Readers (K-5)	Supporting Striving Readers (4-12)
Modules: • How We Learn to Read • Phonological Awareness • Phonics • Fluency • Oral Language • Vocabulary	**Modules:** • The Workshop Re-imagined • Components of Reading Workshop • Teaching Guided Reading with Decodable Texts • Teaching Guided Reading with Leveled Readers • Using Data to Form Guided Reading Groups • Conferring During Reading Workshop	**Modules:** • Cracking the Code: The Reading Brain and Dyslexia • Cracking the Code: Phonology Instruction for Striving Readers • Cracking the Code: Orthographic Instruction for Striving Readers • Cracking the Code: Syllable and Morphology Instruction for Striving Readers • Cracking the Code: Syntax and Semantics Instruction for Striving Readers • Cracking the Code: Assessing Foundational Skills to Support Striving Readers

Number Sense (K-12)	Engaging In Math Workshop Structures and Tasks (K-8)	Culturally Responsive Education (K-12)
Modules: • Nurturing Number Sense to Unlock Students' Mathematical Confidence • Build and Extend Number Sense and Number Talks • Essentials of Number Sense K-2 • Essentials of Number 3-5 • Essentials of Number Sense 6-8 • Essentials of Number Sense 9-12	**Modules:** • Introduction to Math Workshop • Establish and Build Your Math Workshop Community • Start and Finish Strong: Number Sense Routines and Student Self Reflection • Math Workshop: Deep Dive into Learning Stations • Math Workshop: Deep Dive into Guided Math • Math Workshop: Deep Dive into Tasks and Focus Lessons	**Modules:** • Building a Foundation in Culturally Responsive Education • Applied Learning Coaching session #1 • Culturally Responsive Education: Assessing Student Learning • Applied Learning Coaching session #2 • Culturally Responsive Education: Making Instructional Decisions • Applied Learning Coaching Session #3

Not seeing what you want? Build your own Live Online Course and Coaching plan!
Use the individual modules on the next page to build a plan that meets the needs of your teachers.

Live Online Course Modules

Modules are organized by learning categories. Select 1-hour modules from a single category or across multiple categories to build your learning plan. A Live Online Course can consist of six, 1-hour modules or a combination of modules and 1-hour applied learning coaching sessions for a total of six hours

Social Emotional Learning & Equity

- SEL @ School: Establishing a Nurturing and Responsive Environment
- Attending to SEL Needs Throughout Learning
- Structures, Tools, and Tasks for Equity and Access
- Building Connections that Deepen Learning
- Building a Foundation in Culturally Responsive Education
- Culturally Responsive Education: Assessing Student Learning
- Culturally Responsive Education: Making Instructional Decisions

Teaching and Learning Foundations

Math Specific:

- Understand the Dynamics that Impact Student Learning
- Nurturing Number Sense to Unlock Students' Mathematical Confidence
- Build and Extend Number Sense and Number Talks
- Essentials of Number Sense K-2
- Essentials of Number 3-5
- Essentials of Number Sense 6-8
- Essentials of Number Sense 9-12
- From Dot Images to Variables
- Agency 101: Math Makes Sense and I can Make Sense of It

Literacy Specific:

- How We Learn to Read
- The Workshop Reimagined
- Components of Writing Workshop
- Components of Reading Workshop
- Cracking the Code: The Reading Brain and Dyslexia
- Strong Writing: The What and the Why

High-Impact Strategies

- Prioritizing Content to Create Focused Instructional Plans
- Using Rigorous Learning Tasks to Strengthen Understanding
- Bridging Learning Through Instructional Routines
- Advancing Learning Through Collaborative Structures and Tools

Math Specific:

- Prioritize Rich Tasks to Maximize Learning
- Using Discourse to Facilitate Rich Tasks
- Mathematical Reasoning for All Students
- Classroom Discourse Essentials
- The Role of Productive Perseverance in Learning Mathematics
- Cultivate Confident Problem Solvers
- Deepening Understanding through Collaborative Group Work
- Making Sense of Procedural Fluency
- Connect Multiple Representations to Deepen Understanding

Literacy Specific:

- Phonological Awareness
- Phonics
- Fluency
- Oral Language
- Vocabulary
- Comprehension
- Building Knowledge
- Reading Volume
- Teaching Guided Reading with Decodable Texts
- Teaching Guided Reading with Leveled Readers
- Conferring During Reading Workshop
- Managing Reading Worktime
- Reading Workshop: Teaching Mini-lessons
- Conferring in Writing Workshop
- Writing Workshop: Teaching Mini-lessons
- Creating a Community of Readers and Writers
- Cracking the Code: Phonology Instruction for Striving Readers
- Cracking the Code: Orthographic Instruction for Striving Readers
- Cracking the Code: Syllable & Morphology Instruction for Striving Readers
- Cracking the Code: Syntax & Semantics Instruction for Striving Readers
- Setting Students Up for Writing Success
- Inspiring Writers with Mentor Texts
- Revising and Refining Writing
- Conferencing and Goal-Setting

Supporting the Unique Needs of Learners

- Maximizing Learning Through Targeted Use of Instructional Resources
- Structuring Flexible Pathways for Learning
- Designing Learning Tasks to Address Unique Needs

Math Specific:

- Make Math Tasks Accessible for All Learners
- Introduction to Math Workshop
- Establish and Build Your Math Workshop Community
- Start and Finish Strong: Number Sense Routines and Student Self Reflection
- Math Workshop: Deep Dive into Learning Stations
- Math Workshop: Deep Dive into Guided Math
- Math Workshop: Deep Dive into Math Tasks and Focus Lessons

Literacy Specific:

- Supporting All Students in Comprehension

Assessing & Monitoring Student Growth

- Capitalizing on Formative Assessment Opportunities

Math Specific:

- Analyzing Student Work to Support Learning
- Anticipate Common Errors as You Plan for Instruction
- Use Questions to Elicit Evidence of Student Thinking

Literacy Specific:

- Using Data to Form Guided Reading Groups
- Cracking the Code: Assessing Foundational Skills to Support Striving Readers
- Monitoring and Supporting Young Readers in Foundational Skills
- Supporting Young Readers in Vocabulary and Comprehension
- Facilitating Ongoing, Actionable Feedback
