# HMH Ed™ is LMS Friendly

HMH Ed supports Learning Management Systems

HMH's mission is to support every moment in students' and teachers' journeys. To support this mission for our Canvas and Schoology customers, HMH will be offering an LTI connection between HMH Ed, the HMH learning platform, and the Canvas or Schoology LMS platforms. (The connection for Canvas is an LTI Advantage (v1.3) connection. The connection for Schoology is an LTI v1.1 connection.)

HMH Ed Linking Tool App

Customers that meet the co-rostering requirements will be able to set up an LTI-enabled app called the **HMH Ed Linking Tool.**

This platform-to-platform app will allow teachers to find assignable content and assessments on *Ed* and to create links for those items in the LMS. Students can access their assignments from inside the LMS and scored assessment results are shared back from Ed to the LMS gradebook.

The **HMH Ed Linking Tool** app will be available to districts at no charge via the Schoology App Store or via a platform deployment in Canvas. Within *Ed,* administrators will have new self-service tools to allow them to activate the LTI connection between *Ed* and Canvas or Schoology.

For a detailed overview on setup and co-rostering click here.

The HMH Ed Linking Tool app will be available for Canvas deployment on July 19. It will be available in the Schoology App Store available later in July.
