

## **New Features and Updates**

### **August 9, 2019**

#### **HMH Teacher Central**

Version 1.5.9-152 (Digital Teacher Edition)

#### **Updates**

##### **Digital Teacher Edition**

- Popup windows that appear before the session is timed out now display onscreen for 60 seconds.
- Resolved an issue that caused the display window to not display the Digital Teacher Edition when attempting to share the screen with a second device.
- Resolved an issue that caused teachers to have close popup windows on both devices when attempting to share the screen with a second device.
- All goals and optional lessons now display correctly on the Observe Board.

#### ***System 44* Next Generation**

Version 3.1.0-8

#### **Updates**

- Resolved an issue that caused a connection error at login for students moving from *System 44* Enterprise Edition to *System 44* Next Generation.

#### ***Math Inventory***

Version 3.1.0-13

#### **Updates**

- Resolved an issue that caused data aggregation containing *Math Inventory* data to fail.
- Data for all *Math Inventory* assessments taken prior to June 28, 2019 that were archived as part of the v3.1 upgrade have now been restored, and will show on all reports and CSV exports.

## ***iRead***

Version 1.2.1-1

### **Updates**

- *iRead* HTML5 version now has Spanish support.
- Resolved an issue that caused words and letters to be randomly highlighted (Android users only).
- Resolved an issue that caused the Quit window to appear behind the text input window in the Spelling activities when attempting to log out (Android users only).
- Visual improvements to the Spelling activities (Android users only).
- Resolved an issue that kept the Enter key from working in the Spelling activities (Android users only).
- Resolved an issue that allowed special characters to display in the Spelling activities (Android users only).
- Resolved an issue that caused an item in the Screener to not be selected when clicking it, and the user getting stuck.
- Resolved an issue that caused the first letter of spelling words to automatically capitalize, resulting in an incorrect answer (Android users only).
- Resolved an issue that caused the Pause button to remain enabled between screen transitions in the Rhyme section of the Screener.
