

## **Student Achievement Manager (SAM) and System 44 Next Generation HTML5 Client Updates**

HTML5 editions of *System 44* Next Generation and Student Achievement Manager (SAM) are now available for hosted customers, with no action required to access the new applications. Downloadable updates for local customers will be available on a future date.

The updated clients maintain a consistent look and feel for both students and teachers. **There will be no impact to data as a result of the updates.**

Customers may notice the following:

### **Student Achievement Manager (SAM)**

Navigation Enhancements:

- Columns in the Usage Summary Table, Student Enrollment Table, and Teacher Access Table are now frozen to support easier viewing while scrolling.
- The tab button can now be used to navigate across all data entry fields.
- Teachers and admins can now more easily navigate large data sets by page.

Reports:

- If a PDF doesn't launch automatically after a report is run, it may be prevented by the browser pop-up blocker. Please click [here](#) for more information.
- PDF versions of reports are available, but not on-screen versions.

### **System 44 Next Generation**

Students may experience occasional error messages. Please exit and relaunch the application if this occurs. HMM will resolve the issue in an upcoming release.
