

Important Update for Users of the HTML5 Version of Student Achievement Manager (SAM)

In the recently released HTML5 update to the Student Achievement Manager (SAM), reports now open directly as PDFs in a separate browser window. With this upgrade, the following reports functions are no longer available in SAM:

- Sorting Data within reports
- Using This Report link
- Viewing Related Reports link
- Apply Demographic Filter link
- Save A Copy (PDF)
- Print Preview (PDF)

Additionally, Resource (“R”) buttons in onscreen reports are no longer available.

The following workarounds are available:

- **Sorting Data:** Export data using a CSV export and use the spreadsheet sort function.
- **Using This Report and View Related Reports:** This information is available at the bottom of the PDF report.
- **Save A Copy (PDF) and Print Preview (PDF):** Use browser functionality to save and print PDF print reports.
