Overview

SAM Connect is a suite of utilities that allows districts to better manage Scholastic's Enterprise Edition and Next Generation programs. SAM Connect links districts' Scholastic Achievement Manager (SAM) Servers to Scholastic's central server over the Internet, enabling authentication for many of Scholastic's web-based services and products as well as electronic software updates.

About This Manual

There are two sections to this manual, which covers establishing the district's SAM Connect account as well as using the SAM Connect services and functions:

- **Setting Up SAM Connect** explains everything customers need to do before they begin using SAM Connect, specifically:
 - **Registering SAM Servers to SAM Connect:** Districts must register each of their SAM Servers with SAM Connect in order to initiate contact between them.
 - **Creating SAM Connect Administrator Accounts:** SAM Connect requires an administrator at the district level to manage SAM Connect and establish other administrator accounts.
 - **Matching Schools:** In order for the connection between SAM Servers and SAM Connect to function efficiently, districts must correctly identify each school in SAM in the Profile and Contact tabs, so that SAM Connect matches their information to Scholastic servers.
- **Using SAM Connect** explains how to use the SAM Connect Home Screen, create additional SAM Connect administrators, and use the Update Manager and Authentication tab.

While Scholastic recommends that customers register every SAM Server at the district before they log on to SAM Connect, they are not required to do so. If a new SAM Server is installed later, districts may register the server at any time. However, all servers must be registered before districts may fully use SAM Connect services.

This manual covers setting up and using SAM Connect. For other SAM reference issues, see the guide below. All manuals are available at the [Scholastic Education Product Support](#) website.

Setting up an aggregate server, importing or exporting records, or other administrative tasks	<i>SAM Data Management Manual</i>

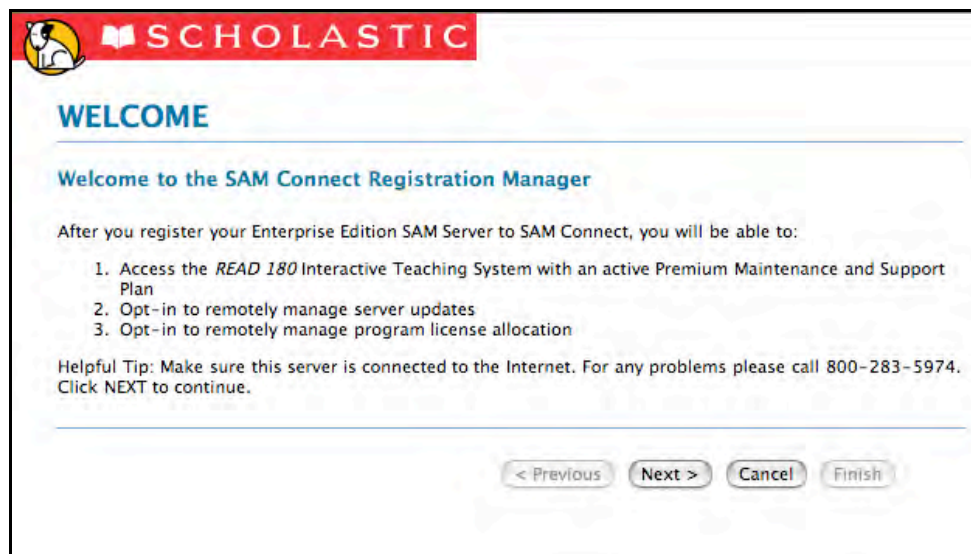

Setting Up SAM Connect

Before districts may use SAM Connect, they must:

1. Register each SAM Server with SAM Connect
2. Identify at least one SAM Connect administrator (either when they register their first SAM Server or by calling Technical Support)
3. Check that SAM Connect has correctly matched their schools on its SAM Server to the SAM Connect Server

Registering District SAM Servers to SAM Connect

SAM Servers must be registered with SAM Connect to be able to use the service and receive server updates.

To register a SAM Server with SAM Connect, install SAM Server v1.9 or later on the server computer, or upgrade the existing SAM Server to v1.9 or later. After the software is installed, the installer prompts users to register the server and download a registration key. Users do not need to have administrator permissions in SAM Connect to register a server. For more information, see the [Installation Guides](#) for any Enterprise Edition or Next Generation program.

Creating SAM Connect Administrator Accounts

The user registering the server with SAM Connect becomes the SAM Connect administrator. The SAM Connect administrator may create other administrators and manage optional services, such as changing the Update Manager settings. Each district must have at least one SAM Connect administrator, but may create as many as it needs.

There are two ways to create a SAM Connect administrator account:

Create an administrator account during SAM Server installation or upgrade by checking **Request SAM Connect Account** on the Server Registration online form. See the SAM Server Installation section of any [Installation Guide](#) for more information.

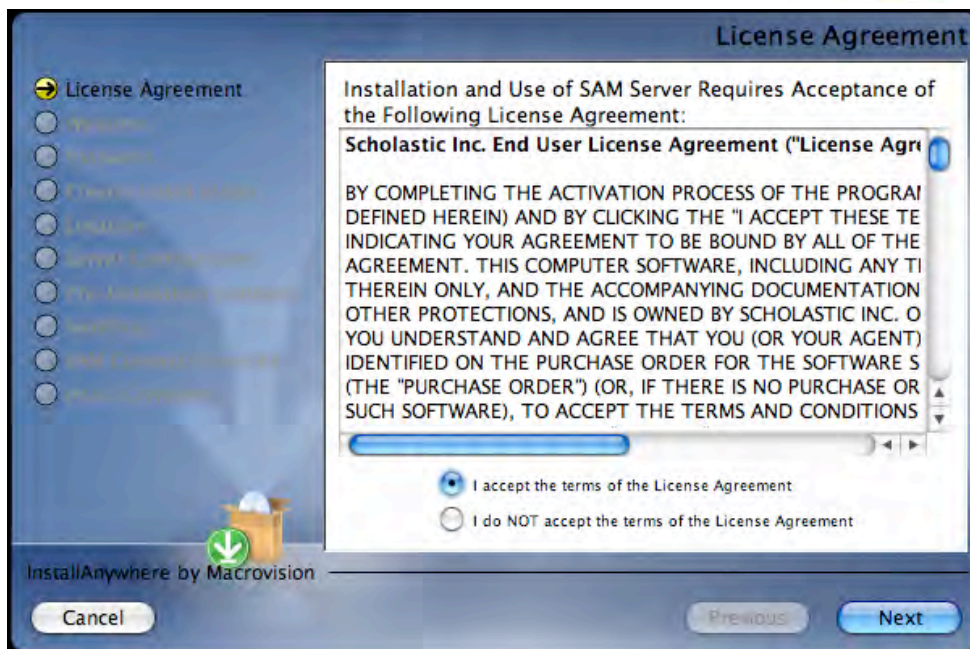

OR

Establish an administrator account directly with Scholastic Technical Support. To do this, follow these steps:

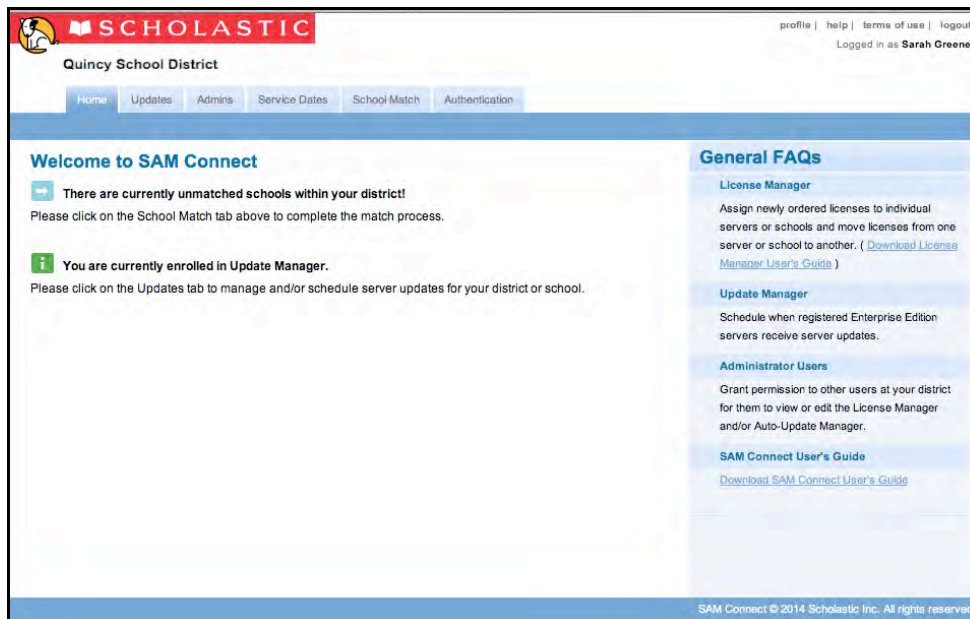

1. Contact Technical Support at 1-877-234-7323 or through the [Scholastic Education Product Support](#) website to verify the administrator is a current district employee. This person then receives a welcome email containing a link to complete the SAM Connect Registration.

A screenshot of the SAM Connect Registration web form. At the top left is the Scholastic logo. To its right is the word "SCHOLASTIC" in white text on a red background. The main heading is "SAM Connect Registration". The form contains two password input fields: "Password" and "Confirm Password", both with "*****" as placeholder text. Below these is a "Register" button. At the bottom left, there are links for "privacy statement" and "terms of service". At the bottom right, the copyright notice reads "SAM Connect © Copyright 2009 Scholastic Inc. All rights reserved."

2. SAM Connect automatically sets the username as the recipient's email address. Enter a password and click **Register**.

3. Use the username and password to log in to the site. If this is the first administrator in the district, the user must accept the **License Agreement**. Click the button next to **I Accept the Terms of the License Agreement** to accept the agreement and go on to the Home Screen of SAM Connect. Choosing **I Do NOT Accept the Terms of the License Agreement** opens a message window that reads: “The License Agreement must be accepted in order to access this site. Log in again to accept the License Agreement.”

- When the License Agreement is accepted, or if the district already has one administrator who has accepted it, the SAM Connect Home Screen appears.

With an administrator account established, the SAM Connect administrator may establish other SAM Connect administrators, opt in to optional services, and set permissions. The new SAM Connect administrator has read only privileges until the Update Manager (*page 17*) is activated.

To create additional SAM Connect administrator accounts, use the Admins tab on the Home Screen (*page 30*).

Naming SAM Servers

Name the district's SAM Server(s) as part of the SAM Connect registration process. Naming conventions are important, as they directly affect the ability to identify servers.

Best Practices for Naming SAM Servers

- Server names **MUST BE** unique. Having two servers with the same name in the same SAM deployment will cause errors in data reporting and result in inaccurate reporting.
- Avoid generalities in naming servers (“the Scholastic server,” “the reading server,” “the math server”).
- Use either a district or school name in the server's name (“Quincy District 1,” “Quincy Middle School”).
- If a server is dedicated to one program or suite of programs, use the name of the program in the name of the server (“Quincy District_R180”).

Matching Schools

District SAM Servers must be matched to SAM Connect in order for all features to fully function, as well as to authenticate and access the Interactive Teaching Systems (ITS) for *READ 180* and *System 44*[®]. SAM Connect attempts to match schools based on the school name and mailing address as entered in SAM.

Registered SAM Servers synchronize with SAM Connect about once every 30 minutes. When a registered SAM Server informs SAM Connect of a change in data, SAM Connect attempts to match that school.

Next Generation Program Users: Data received in SAM Connect is reported in the Next Generation Teacher and Leadership Dashboards. In order for this data to be reported correctly and accurately, it is vital that the SAM Servers that communicate with SAM Connect be properly matched. Data from unmatched servers will be incomplete and can possibly result in inaccurate analysis.

If SAM Connect cannot match a school on a SAM Server, it sends an email to the SAM Connect administrator explaining the problem and providing a link to the **School Match** tab on the SAM Connect Home Screen.

There are two ways to manually match schools. **Scholastic recommends Option A**, as it ensures that the match remains once it is made, even if the school's information moves to another database. Use **Option B** if SAM Connect detects mismatched schools while trying to opt in to optional services.

Profile for Quincy School

Contact Name: Greene, Sarah

- On the Contact tab, update the School Address Line, City, State, and ZIP Code fields so that they are the correct mailing address.

The SAM Server will update this information at the next scheduled SAM Connect synchronization.

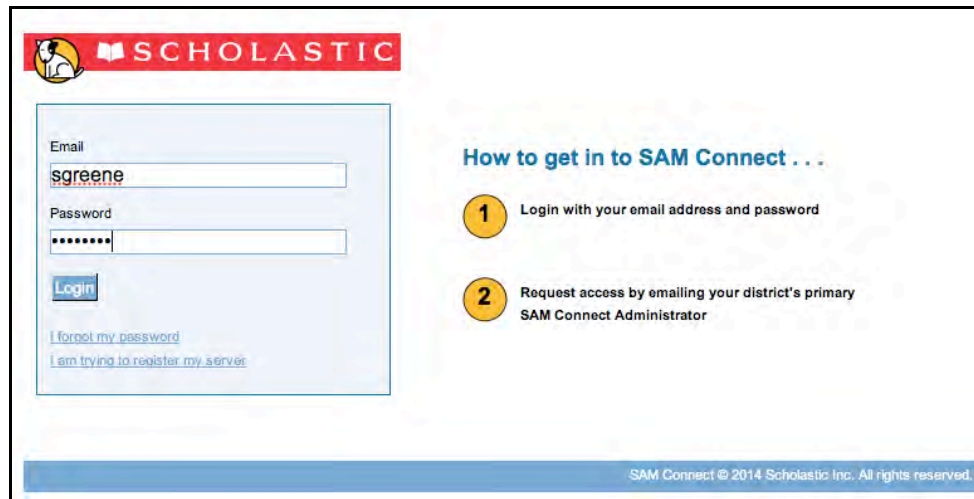

Option B: Use the School Match tab (page 32) in SAM Connect to match schools.

Using SAM Connect

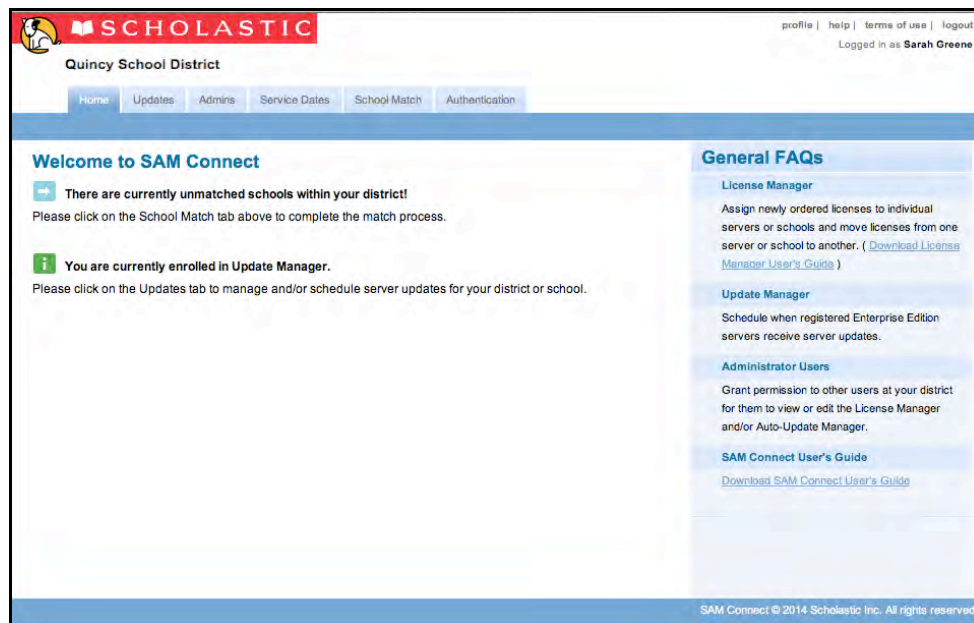

The SAM Connect Home Screen is the web-based interface where administrators may manage their SAM Connect account and optional services.

Accessing the Home Screen

To access the Home Screen, go to this URL: <https://samconnect.scholastic.com>. Enter the email username and password and click **Login** to go to the Home tab.

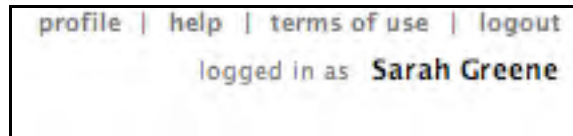

The Home Tab

The Home tab provides general overall information about SAM Connect. The five tabs access the different functions of the program. Tabs that require special permissions do not appear for administrators who do not have those permissions.

The Menu Bar

The Menu Bar appears in the upper right corner of every screen and includes the following options:

- **Profile:** This opens the **Edit Administrators** screen, displaying the data for the administrator currently logged in.
- **Help:** This opens the Frequently Asked Questions screen.
- **Terms of Use:** This links to the License Agreement accepted by the administrator when installing the SAM Server and registering with SAM Connect.
- **Logout:** This logs the user out of SAM Connect.
- **Logged In:** This displays the name of the administrator logged in.

Once a district has registered its servers and created at least one SAM Connect administrator, that district may use SAM Connect in read only mode. Once an optional service is activated, administrators may access tabs for those services, and they are no longer read only.

The Updates Tab

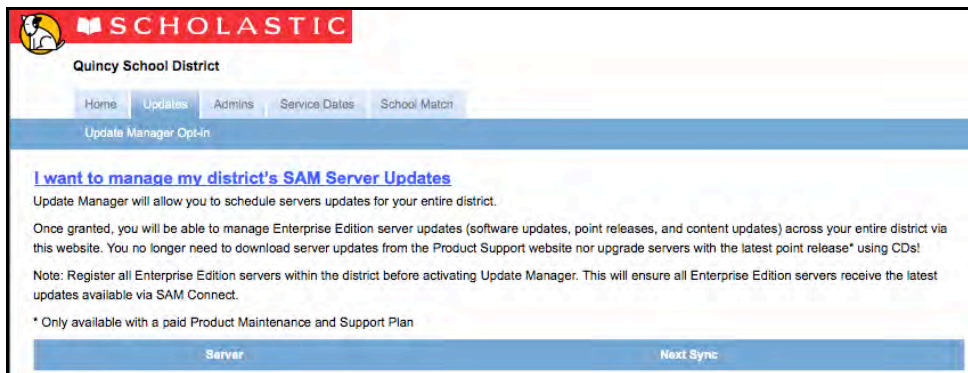

Administrators with permissions to manage optional services may view the Update Manager screens as read only until opting in to the service.

Opting In to the Update Manager

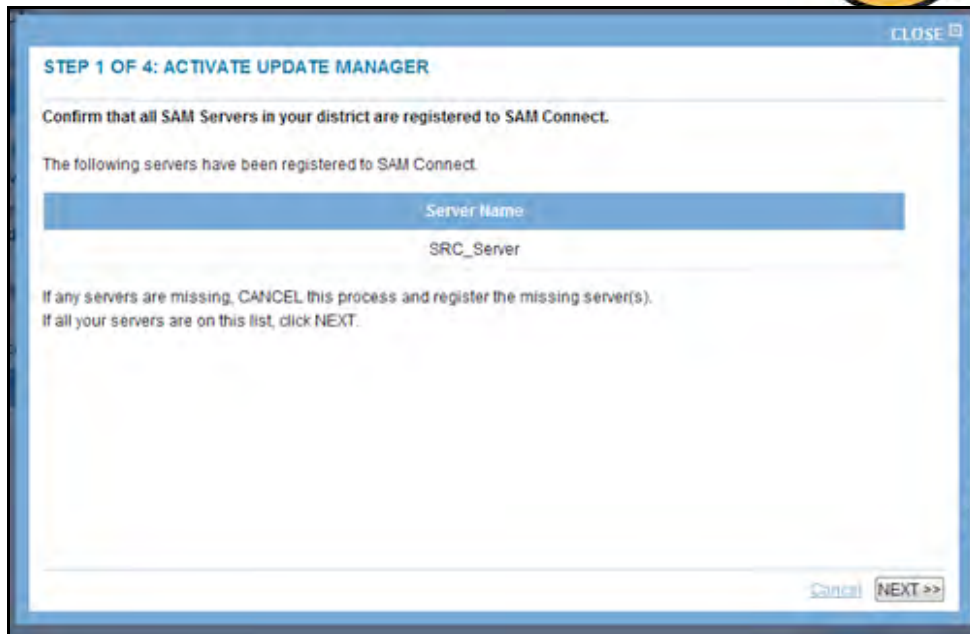

The **Update Manager** enables users to schedule server updates and *Scholastic Reading Counts!* quiz updates to registered SAM Servers. To activate the Update Manager, a SAM Connect administrator with Manage Server permissions must opt in to the service. Once the Update Manager is activated, it remains active for the district and any user may schedule automatic updates for each SAM Server.

To opt in to the Update Manager:

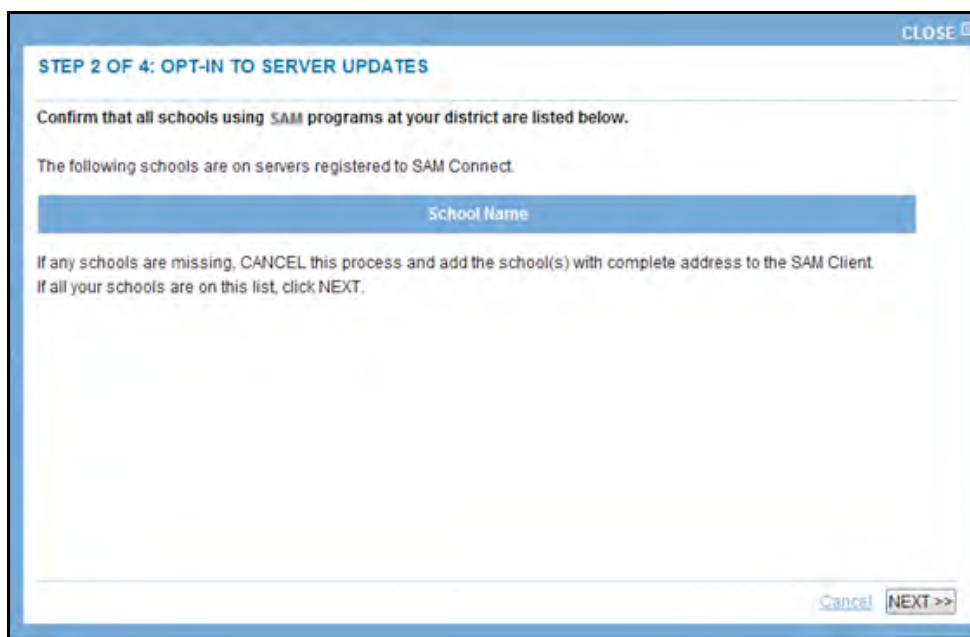

1. Register all of the district's SAM Servers with SAM Connect and log into SAM Connect as an administrator.

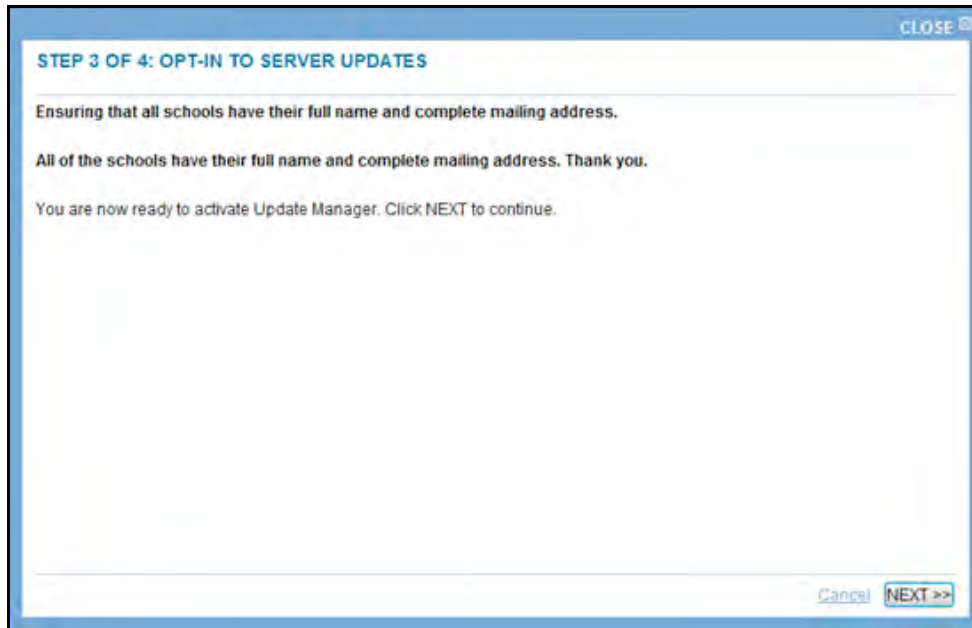

2. Click the Updates tab, then click **I Want To Manage My District's SAM Server Updates**.

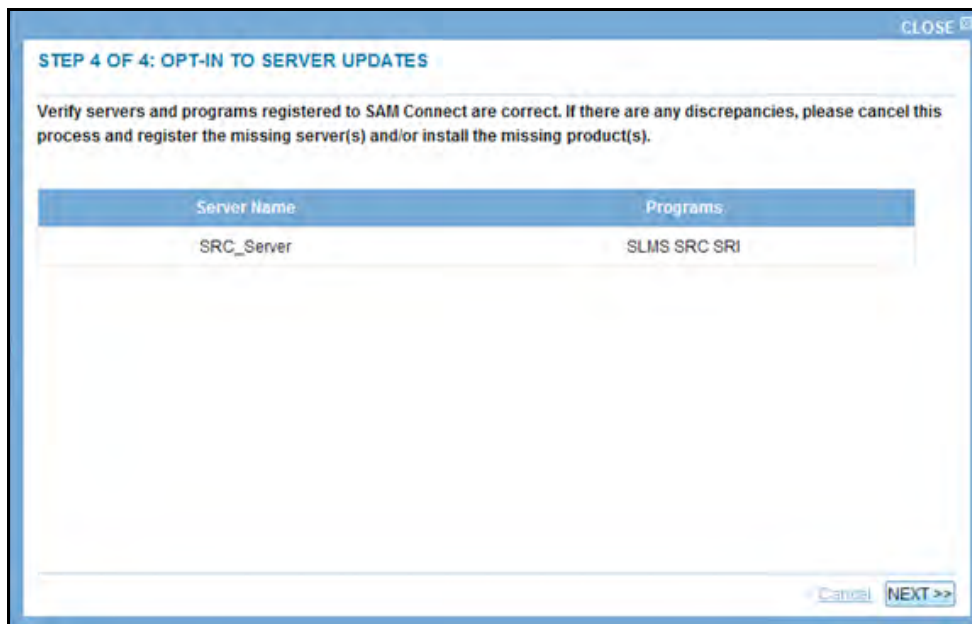

3. SAM Connect displays a list of the district's currently registered SAM Servers. If the list is complete, click **Next**. If more servers need to be added, click **Cancel** and register the missing servers with SAM Connect (page 5).

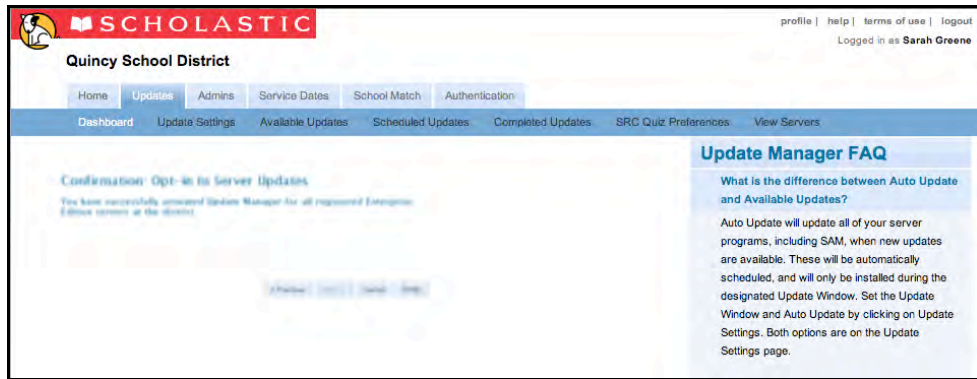

4. SAM Connect displays a list of every school name on the district's registered SAM Servers. If this list is complete, click **Next**. If this list is missing school names, click **Cancel**. A school name is missing because its SAM Server is not registered. Register the missing servers with SAM Connect (page 5).

5. SAM Connect attempts to match the schools on the registered SAM Servers. If every district school matches an existing school entry, click **Next**. If there are schools whose names or addresses don't match, SAM Connect displays their names here, as they exist on the SAM Servers. See *page 19* for instructions on matching schools.

6. SAM Connect lists each SAM Server that the district has registered with SAM Connect and the programs installed on each server. If the list is correct, click **Submit**. If there is an error in the list, click **Cancel** and contact Scholastic Technical Support (*page 43*).

7. Click **Finish** to go to the Update Settings heading to set up the Update Manager.

Setting Up the Update Manager

After opting in to the Update Manager, the Update Settings Screen appears.

These settings must be initialized before automatic updates may be scheduled:

- Time Zone:** Select the time zone from the Update Customer Time Zone pull-down menu. Click the **Save Time Zone** button to save the setting.
- Automatic Update Settings:** Choose to receive updates automatically or schedule the updates as they become available. Set server updates to automatically install during the Update Window by clicking the Automatic Update Settings checkbox (the default setting is unchecked, or not set to Auto Update). Click **Save Auto Update Preference** when finished.
- Update Window:** If using Automatic Update, set the time Automatic Update should run in the **Modify Update Window** section. Set the Update Window to a day and time when students or teachers are not accessing the SAM Server. The update window must be at least six hours long. Days apply to the Start Time. Click **Mon** and set **Start** to 10 PM to set Update Window from 10 PM Monday night to 6 AM Tuesday morning (the default is Friday 11 PM to Saturday 5 AM and Saturday 11 PM to Sunday 5 AM). When finished, click **Save Update Windows Settings** to see a summary of the selection.

When Update Manager is set up, administrators with permissions to manage optional services may change the settings at any time.

Using the Updates Tab

Update Settings

Customer configured time zone is set to US/Eastern

Auto Update will automatically install server updates as they become available. Updates will be installed only during your designated Update Window.

Monday: 12 AM - 11 PM

Update Manager FAQ

What is the difference between Auto Update and Available Updates?

Auto Update will update all of your server programs, including SAM, when new updates are available. These will be automatically scheduled, and will only be installed during the designated Update Window. Set the Update Window and Auto Update by clicking on Update Settings. Both options are on the Update Settings page.

Alternatively, to schedule server updates server-by-server, click on Available Updates and then select which server receives which update. No updates will be scheduled or installed until scheduled individually.

Finally, if all Available Updates should be scheduled immediately, Click on Available Updates, then the link called "Schedule All Updates Now" to have all Available Updates installed immediately.

How do I set my server(s)'s Time Zone?

Click on the "Update Settings".

Can I schedule different servers to receive updates at different times?

Yes. Choose Available Updates to select which servers and schedule each update individually.

Will I receive a reminder email before an update is installed?

The Updates tab is where administrators choose how to receive server updates, set the Update Window for automatic updates, and choose which servers or programs they need to update.

Only administrators with permissions to manage optional services may access this tab.

The Updates tab consists of the following screens:

- Dashboard
- Update Settings
- Available Updates
- Scheduled Updates
- Completed Updates
- SRC! Quiz Updates
- All Servers

When users first access the Updates tab, they arrive at the Dashboard. Access the other screens by clicking the headings in the menu.

Update Manager FAQ

What is the difference between Auto Update and Available Updates?

Auto Update will update all of your server programs, including SAM, when new updates are available. These will be automatically scheduled, and will only be installed during the designated Update Window. Set the Update Window and Auto Update by clicking on Update Settings. Both options are on the Update Settings page.

Alternatively, to schedule server updates server-by-server, click on Available Updates and then select which server receives which update. No updates will be scheduled or installed until scheduled individually.

Finally, if all Available Updates should be scheduled immediately, Click on Available Updates, then the link called "Schedule All Updates Now" to have all Available Updates installed immediately.

How do I set my server(s)'s Time Zone?

Click on the "Update Settings".

Can I schedule different servers to receive updates at different times?

Yes. Choose Available Updates to select which servers and schedule each update individually.

Will I receive a reminder email before an update is installed?

The Dashboard provides a snapshot of update settings. It has several panels:

- **Update Settings:** Shows the current settings for the district's Auto Update, Time Zone, and Update Window options. To change these settings, click **Update Settings** or the **Edit Settings** link to open the Update Settings Screen.
- **Available Updates:** Shows which updates are currently available to the district for download to registered SAM Servers. Updates are listed by Program, Version, and the Number of Servers the update applies to. Each time the update is successfully applied to a server, the number of servers decreases by one. If the district is receiving Auto Updates, updates appear in the Scheduled Updates list instead. Click **More Details** to access the entire list in a separate screen.
- **Scheduled Updates:** Shows which updates are scheduled for the district's registered SAM Servers, displayed with the Scheduled Date, Program, Version number, and Server name. Once a scheduled update is completed, the listing moves to the Completed Updates list. To access the entire list, click **More Details**.

- **Completed Updates:** Shows updates that have been applied to the district's SAM Servers, displayed with the Scheduled Date, Completed Date, Program, Version number, and Server name. To access the entire list in a separate screen, click **More Details**.
- **Snapshot:** Shows how many active SAM Servers and schools on these servers are registered with SAM Connect, as well as the district's Update Manager status.
- **Alerts:** Shows how many SAM Servers have not synchronized with SAM Connect within the last 4 hours and the last 12 hours (servers should typically synchronize approximately once every half hour). Click the number to access the **All Servers** screen for more information.

Update Manager FAQ

What is the difference between Auto Update and Available Updates?

Auto Update will update all of your server programs, including SAM, when new updates are available. These will be automatically scheduled, and will only be installed during the designated Update Window. Set the Update Window and Auto Update by clicking on Update Settings. Both options are on the Update Settings page.

Alternatively, to schedule server updates server-by-server, click on Available Updates and then select which server receives which update. No updates will be scheduled or installed until scheduled individually.

Finally, if all Available Updates should be scheduled immediately. Click on Available Updates, then the link called "Schedule All Updates Now" to have all Available Updates installed immediately.

How do I set my server(s)'s Time Zone?

Click on the "Update Settings".

Can I schedule different servers to receive updates at different times?

Yes. Choose Available Updates to select which servers and schedule each update individually.

Will I receive a reminder email before an update is installed?

The Update Settings Screen enables administrators to choose whether to receive updates automatically. Administrators may also reset the Update Window and Time Zone from this screen. See [page 27](#) for instructions on scheduling updates.

The screen is divided into three sections:

- **Modify Update Window:** Allows users to change the times of scheduled updates. To change settings, select the day of the week and hour of the day to begin updates, and click the **Save Update Window** button to save changes.
- **Auto Update Settings:** Allows users to choose to receive updates automatically. To change the setting, click the checkbox to apply Auto Updates, or leave the checkbox empty to individually apply updates. Click **Save Auto Update Preference** to save changes.
- **Update Customer Time Zone:** Allows users to change time zone settings. To change settings, select the district's time zone and click the **Save Time Zone** button to save changes.

The Available Updates Screen

The screenshot shows the 'Available Updates' screen for Quincy School District. At the top, there is a navigation bar with tabs for Home, Updates, Admins, Service Dates, School Match, and Authentication. Below this is a sub-navigation bar with Dashboard, Update Settings, Available Updates (selected), Scheduled Updates, Completed Updates, SRC Quiz Preferences, and View Servers. The main content area is titled 'Available Updates' and includes a link to 'Schedule All Available Updates Now'. Below this is a search bar and a table with the following data:

Name	Program	Version	Server Name	Action
SAM Server	READ 180	8884	educ-server	Schedule

Below the table, it says 'Showing 1 to 1 of 1 entries'. To the right of the table is an 'Update Manager FAQ' section with the heading 'What is the difference between Auto Update and Available Updates?' and a paragraph explaining that Auto Update will update all server programs, including SAM, when new updates are available.

The Available Updates Screen displays the updates that administrators may apply to district SAM Servers by Program, Version Number, and the Number of Servers to which it may be applied. Software updates are available to all users. SRC! quiz updates are available to customers with an active SRC! Content Renewal Plan.

Administrators may search the table to see available updates displayed by program or by server by using the Search functionality. They may adjust the number of items displayed on each page using the pull-down menu. There is also a **Schedule** link that may be used to schedule the update. Once the update is scheduled, it moves from the Available Updates Screen to the Scheduled Updates Screen (page 28). If the district is set to receive updates automatically, no updates appear on this list; available updates appear automatically on the Scheduled Updates Screen.

Administrators may apply updates in two ways:

- **Schedule All Updates Now:** Click the **Schedule All Available Updates Now** link at the top of the screen to apply every displayed update to every eligible server immediately.
- **Schedule Updates Individually:** Click the **Schedule** link next to the selected update to apply updates to servers individually.

The Scheduled Updates Screen

The screenshot shows the 'Scheduled Updates' screen in the SAM Connect application. At the top, it displays the Scholastic logo and the user's name, Sarah Greene. The main content area features a table with the following data:

Scheduled At	Name	Program	Version	Server Name	Action
05/20/14 (12:00:00 AM)	SAM Server	READ 150	8864	educ-server	Cancel

To the right of the table is an 'Update Manager FAQ' section with the following text:

What is the difference between Auto Update and Available Updates?

Auto Update will update all of your server programs, including SAM, when new updates are available. These will be automatically scheduled, and will only be installed during the designated Update Window. Set the Update Window and Auto Update by clicking on Update Settings. Both options are on the Update Settings page.

Alternatively, to schedule server updates server-by-server, click on Available Updates and then select which server receives which update. No updates will be scheduled or installed until scheduled individually.

The Scheduled Updates Screen displays any update currently scheduled to be applied to a SAM Server.

Once an update is applied to a SAM Server, that update moves from this list to the Completed Updates Screen. To cancel an update, click the **Cancel** link; to select a different Start Hour or Day for an update, click the **Reschedule** link.

Each row in the table represents one program update on one server. The table displays the following:

- **Scheduled At:** The Start Hour selected for the update on that server
- **Name:** The update name
- **Program:** The program being updated
- **Program Version:** The program's version number
- **Server:** The server where the update is being applied
- **Actions:** Any action taken (cancellations, reschedulings) during the update

The Completed Updates Screen

The screenshot shows the 'Completed Updates' screen for Quincy School District. The page header includes the Scholastic logo and user information: 'profile | help | terms of use | logout' and 'Logged in as Sarah Greene'. The navigation menu includes: Home, Updates, Admins, Service Dates, School Match, Authentication, Dashboard, Update Settings, Available Updates, Scheduled Updates, Completed Updates, SRC Quiz Preferences, and View Servers. The main content area is titled 'Completed Updates' and features a table with the following data:

Status	Scheduled At	Completed At	Name	Program	Version	Server Name
Failure	05/03/14 (12:10:55 AM)	05/06/14 (09:42:10 PM)	SRC! Server 1.10.1	src	8864	openbook_server
Successful	05/06/14 (12:00:00 PM)	05/06/14 (04:03:43 PM)	May 2014 K-2 monthly	srcquiz01	201405	HOSTED
Successful	05/06/14 (12:00:00 PM)	05/06/14 (02:52:02 PM)	May 2014 3-5 monthly	srcquiz02	201405	HOSTED

To the right of the table is an 'Update Manager FAQ' section with the heading 'What is the difference between Auto Update and Available Updates?' and a paragraph explaining that Auto Update will update all server programs, including SAM, when new updates are available.

The Completed Updates Screen displays each attempt to update district SAM Servers. Each row in the table lists the following:

- **Status:** The success or failure of update attempts. Failed updates instantly appear on the **Available Updates** screen
- **Scheduled At:** The time the update was scheduled to start
- **Completed At:** The time the update completed
- **Name:** The update name
- **Program:** The program being updated
- **Version:** The program's version number
- **Server Name:** The server where the update was applied

The SRC! Quiz Preferences Screen

The screenshot shows the 'SRC! Quiz Preferences' screen. At the top, it says 'Quincy School District' and 'Logged in as Sarah Greene'. The navigation bar includes 'Home', 'Updates', 'Admins', 'Service Dates', 'School Match', and 'Authentication'. Below this is a sub-navigation bar with 'Dashboard', 'Update Settings', 'Available Updates', 'Scheduled Updates', 'Completed Updates', 'SRC! Quiz Preferences', and 'View Servers'. The main content area is titled 'SRC! Quiz Preferences' and includes a note: 'Customer configured time zone is set to US/Eastern'. Below this, it states 'SRC! Quiz Updates will automatically be installed during the following Update Window:' followed by a list of days and times: Monday 7 AM - 6 PM, Tuesday 7 AM - 6 PM, Wednesday 7 AM - 6 PM, Thursday 7 AM - 6 PM, and Friday 7 AM - 6 PM. A table allows users to select servers and grades for updates. The table has columns for 'Server Name', 'K-3', '3-5', 'K-4', '9-12', 'Corrections', and 'All'. The rows are 'educo-server', 'SAM Server', and 'All Servers'. Checkmarks are visible in the 'K-3', '3-5', and 'K-4' columns for 'educo-server' and 'SAM Server'. A 'Save SRC! Quiz Preferences' button is at the bottom left. On the right side, there is an 'Update Manager FAQ' section with text explaining the difference between Auto Update and Available Updates, and instructions on how to schedule updates server-by-server or all at once.

The SRC! Quiz Preferences Screen allows users to set preferences for using SAM Connect to automatically update SRC! quizzes.

This service is available only to districts with an active SRC! content plan.

Use the boxes to set the servers that will receive updated quizzes. Click **All** to have SAM Connect update all the SRC! quizzes on a particular server, or use the boxes to select the grades on the server that will receive updated quizzes.

When finished, click **Save SRC Quiz Preferences** to save the selections.

The View Servers Screen

A screenshot of the 'View Servers' screen in the SAM Connect interface. The page header includes the Scholastic logo, the text 'SCHOLASTIC', and the user's name 'Sarah Greene'. A navigation menu at the top lists various options like 'Home', 'Updates', 'Admins', etc. The main content area is titled 'VIEW BY SERVER' and contains a table with two columns: 'Server' and 'Next Sync'. The table lists three servers: 'SAMLINCOLN (Server ID: 51097)', 'Fast Math (Server ID: 46428)', and 'educ-server (Server ID: 64326)'. To the right of the table is a sidebar titled 'Update Manager FAQ' with a sub-heading 'What is the difference between Auto Update and Available Updates?' and a paragraph of text explaining the update process.

Server	Next Sync
SAMLINCOLN (Server ID: 51097)	2014-05-20 16:18:23.0
Fast Math (Server ID: 46428)	2014-05-20 16:37:58.0
educ-server (Server ID: 64326)	2014-05-20 16:56:52.0

The View Servers Screen displays every SAM Server registered for the district by server name and next scheduled synchronization.

Click the server link to view or change server specification details, including available updates, scheduled updates, completed updates, products installed, and server settings.

Scheduling Updates

There are three ways in which administrators with permissions to manage server updates may schedule updates:

- **Automatic Updates:** If administrators select the **Auto Update** checkbox on the Update Settings Screen (*page 21*), the district receives updates automatically as they become available and only during their established Update Window days and/or start times.
- **Individually Scheduled Updates:** If administrators do not select the **Auto Update** checkbox on the Update Settings Screen (*page 21*), they may apply any available update to individual servers at any time and schedule them individually.
- **Schedule All Updates Now:** If administrators do not select the **Auto Update** checkbox on the Update Settings Screen (*page 21*), they may apply every available update to every server immediately.

Automatic Updates

Administrators choosing **Automatic Updates** set their district's update settings once. To set the Auto Update settings:

1. Click the Updates tab.
2. Click **Update Settings**.
3. Under Modify Update Window, select the Start Hour, End Hour, and days of the week that updates are applied. These should be hours when no one is using the servers, and backups are not scheduled.
4. Click the **Save Update Window** button.
5. Under Auto Update Settings, select the check box for Install Updates.
6. Click **Save Auto Update Preference** to save and activate these settings.

Whenever Scholastic makes a SAM Server update available, administrators with permissions to manage server updates receive an email explaining that a new update is available. The new update appears in Scheduled Updates (*page 23*), and administrators may either reschedule the update or allow the update to proceed as scheduled.

When the servers are updated, SAM Connect sends an email to all administrators with permissions to manage optional services announcing whether or not the update was successful, and the date and time it was completed. In addition, the Completed Updates Screen lists the server, date, time, and specific update applied.

Individually Scheduled Updates

Districts that choose to control their updates directly may apply available updates individually to each server by not selecting the **Auto Updates** checkbox in the Update Settings Screen (page 21).

Administrators with permissions to manage server updates who choose to individually schedule updates receive an email alerting them that the new update is available. The update is also listed on the Available Updates Screen. To individually apply an update:

1. Click the Updates tab.
2. Click **Available Updates** (the list may be sorted by program or server and may be filtered by program).

Name	Program	Version	Server Name	Action
SAM Server	READ 180	1.10.1	educ-server	Schedule

3. Click the **Schedule** link next to the Update being applied to go to the Scheduling Update Wizard.

SCHEDULE UPDATE WIZARD

You have selected to schedule **SAM Server** for server: **educ-server**

Program: READ 180

Version: 1.10.1

Please select time for your update below:

Month/Day/Year: MAY / 20 / 2014

Time: 12:00 AM

[Cancel](#) [NEXT >>](#)

4. Confirm the server, program, and version to be updated, then select the date and time to begin the update. Click **Next** to continue. If SAM Connect cannot update the server at the selected time (if, for example, the server cannot sync with SAM Connect), it will attempt the update again during the next day or hours allotted in the Update Window.

5. If satisfied with the selections on the Confirmation Screen, click **Finish**.

When the Individually Scheduled Update option is complete, the update moves from the Available Updates Screen to the Scheduled Updates Screen (if the update applies only to some servers, it remains on the Available Updates Screen with the number available decreased). Administrators with permissions to manage server updates receive an email explaining which servers will be updated and when. Each server downloads the update at the selected time and sends a second email confirming the process is complete. The Completed Updates Screen lists the server, date, time, and update applied.

Schedule All Updates Now

Districts that choose to update servers individually may apply available updates to every eligible server at once. Administrators for these districts should not select the **Auto Updates** checkbox in the Update Setting Screen (*page 21*).

Administrators with permissions to manage server updates will receive an email when new updates are available. Updates are also listed on the **Available Updates** screen. To apply all available server updates immediately:

1. Click the Updates tab.
2. Click **Available Updates**.
3. Click the **Schedule All Available Updates Now** link.
4. Click **OK** to update each of the listed servers with the available updates. Click **Cancel** to return to the previous screen.

After clicking **OK**, every eligible server downloads the updates upon next synchronization with SAM Connect. In other words, all Available Updates will begin to be applied to all servers within the next 30 minutes. Administrators with permissions to manage server updates receive an email explaining that the update has been completed, and the Completed Updates Screen lists the server, date, time, and specific update applied.

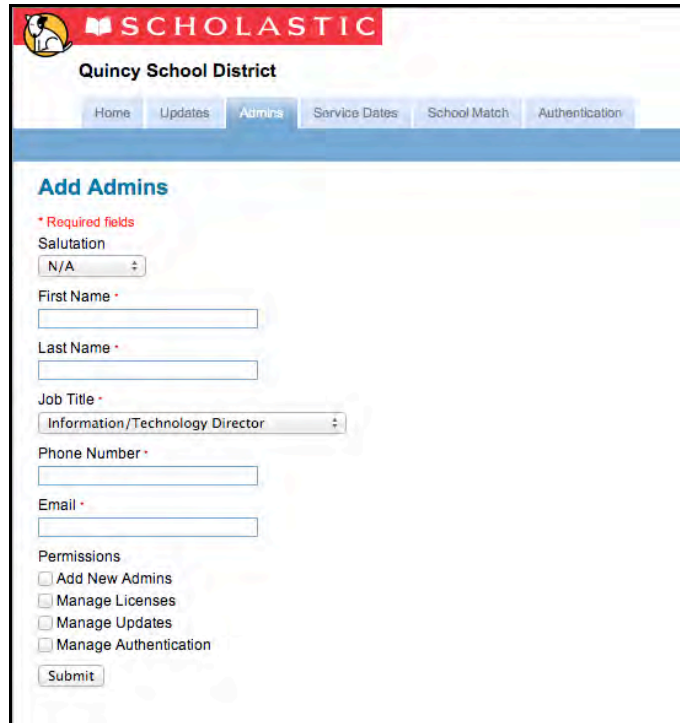

The Admins Tab

The Admins tab allows SAM Connect administrators to create additional SAM Connect administrator accounts as well as manage all administrator accounts.

To create a new SAM Connect administrator account:

1. Click the **Add Admins** button from the Admins tab.

2. Fill in the information on the Add Admins Screen and hit **Submit**.
3. The administrator roster appears with the new administrator account listed.

To manage administrator accounts, click the **Edit** button next to the account name to edit that account's information and permissions.

To delete an administrator account, click **Delete** next to the account name.

Premium Maintenance & Support Plans include access to software updates, maintenance releases, and the READ 180 ITS

Service Dates Help

What are the types?

Read 180 Interactive Teaching System (ITS): With a Premium Support Plan teachers get anytime, anywhere access to the Read 180 ITS.

Product Support Plan: Each school with an active plan is listed on this page with corresponding expiration date.

Scholastic Hosting Services: Each district that has purchased hosting services is listed on this page with corresponding expiration date.

Scholastic Reading Counts! (SRC!) Quiz Subscriptions: Monthly delivery of SRC! quizzes as part of your Student Access Fee or District Plan. Each school with an active plan is listed on this page with corresponding expiration date.

What if I want to extend?

Contact your Account Executive to renew your subscription or send in a new PO to renew for another year.

Support Plans and Hosting Service: Visit [READ180 Support](#) for more information or to download an order form. Don't see your school? Contact Customer Service at 1-877-234-READ to make sure you have an active plan or place an order.

The Service Dates tab lists all the district's subscriptions with Scholastic by District/School, Type of Service, and Expiration Date. There are four types of services:

- **Interactive Teaching System (ITS):** Provides teachers with online access to the *rBook® Teacher's Edition* and the three *Resources for Differentiated Instruction* books, the *System 44 Teacher's Edition* and the *44Book*
- **Product Maintenance and Support Plan:** Provides districts and schools various technical support plans
- **Scholastic Hosting Services:** Provides a dedicated and secure application server for schools or districts
- **Scholastic Reading Counts!® Quiz Subscriptions:** Provides monthly delivery of SRC! quizzes as part of a district's Student Access Fee or District Plan

The School Match Tab

SCHOLASTIC

Quincy School District

Home Updates Admins Service Dates **School Match** Authentication

Unmatched Matched Pending

Unmatched Schools

Below is a list of schools that could not be automatically matched to the Scholastic Database. Click on the Match button to manually select the matching school.

Before starting this process, it is HIGHLY recommended that you update the address and contact information for each school using the SAM client. Doing so may allow you to avoid manually matching your school(s).

Address as Entered	SAM Server Name	
Quincy School One Quincy Place Quincy, NY 12001	Quincy_1	<input type="button" value="Match"/> <input type="checkbox"/> Mark as "Test School Only"

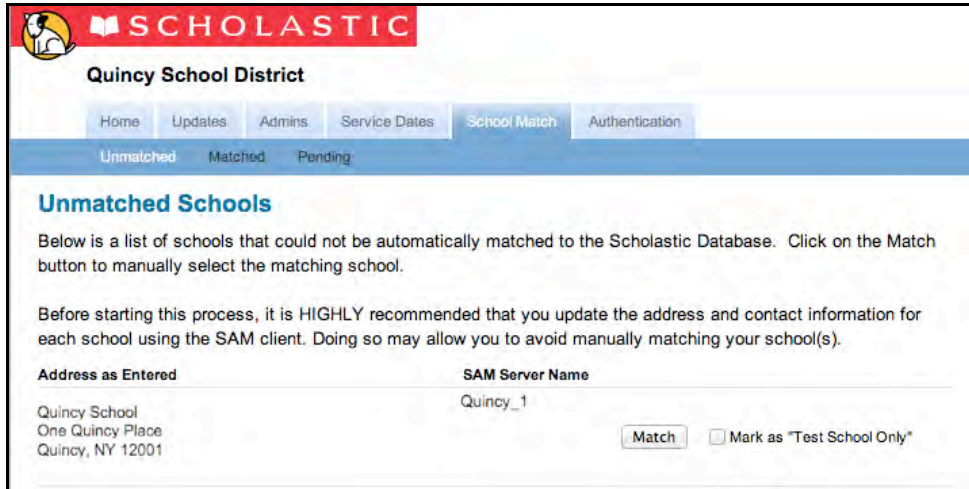

The School Match tab displays all unmatched schools in the district. The table displays the schools by address as entered in SAM (Address as Entered), and by the nickname of the SAM Server where the school is listed (SAM Server Name).

Click the **Match** button in the school's row to open the School Match Wizard, or select the **Mark as "Test School Only"** checkbox if the listed school is not an actual school (some districts create fake schools for the purpose of running reports).

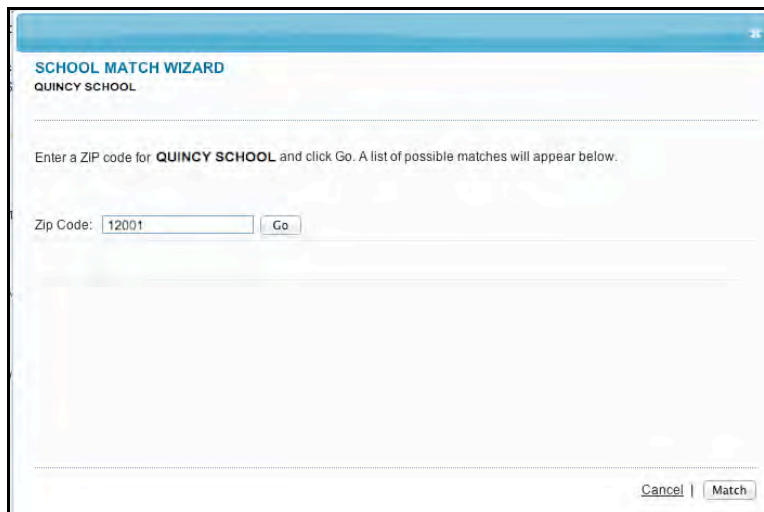

The School Match Wizard

To use the School Match Wizard:

1. Click the School Match tab to display a list of unmatched schools. The school name is displayed as it is registered on one of the district's SAM Servers. If a district has created schools in the SAM Client merely for administrative purposes (to run different sets of reports, for instance), select the **Mark as "Test School Only"** checkbox for that school. Otherwise, click the **Match** button to open the School Match Wizard.

2. Enter the ZIP code of the selected school and click **Go** to display a list of every school in the Scholastic Customer Database in that ZIP code.

SCHOOL MATCH WIZARD
QUINCY SCHOOL

Enter a ZIP code for **QUINCY SCHOOL** and click Go. A list of possible matches will appear below.

Zip Code:

<input type="radio"/> Quincy District Office	One Quincy Place, Quincy NY 12001	Available
<input type="radio"/> Quincy School	One Quincy Place, Quincy NY 12001	Available

3. If the unmatched school is on the list, select the button for that school and click **Match** to open a confirmation screen.

SCHOOL MATCH WIZARD

Congratulations! You have matched Quincy School - 4/15/14 - 6/15/14 to Quincy District Office.

4. The confirmation screen lists the name as it appears on the district server and as it appears in the SAM Connect database. Click **Finish** to return to the School Match tab to match another school.

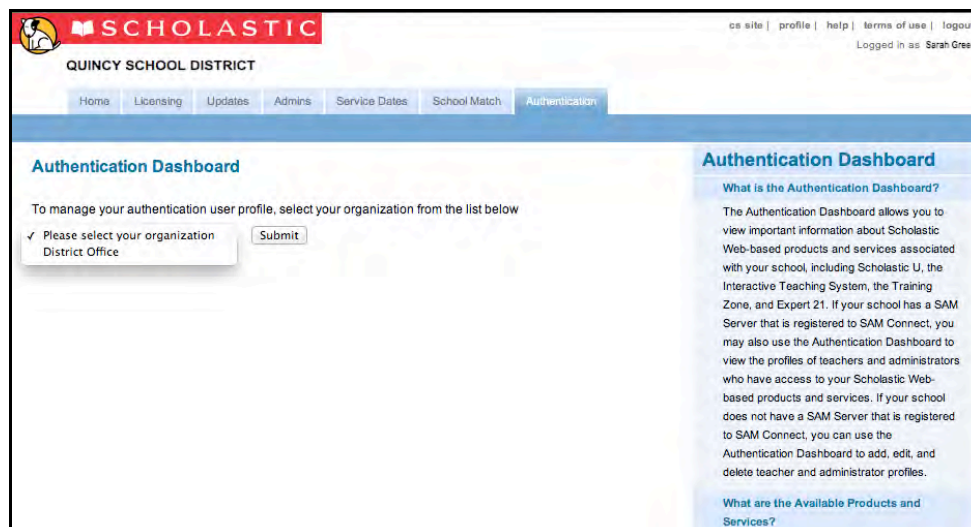

The Authentication Tab

The Authentication tab allows SAM Connect administrators to view and manage access to the district's web-based programs (including Scholastic U[®] Expert 21, the Interactive Teaching System, the Training Zone, and others).

The Authentication tab works in one of two ways, depending on whether a district's servers are registered with SAM Connect:

- Schools and Districts with Registered SAM Servers:** SAM Connect administrators from districts with servers registered to SAM Connect may use the Authentication tab to view the district's web-based programs and the users in their district who have access to these programs. User information on the Authentication Tab is read only for schools or districts with servers registered to SAM Connect. Administrators may change the displayed information in SAM (see [Getting Started With Scholastic Achievement Manager](#)) and these changes will be reflected on the Authentication tab at the next SAM Connect update.
- Schools and Districts without Registered SAM Servers:** Administrators from districts that do not have SAM installations, or whose school or district servers are not registered to SAM Connect, may use the Authentication tab to import rosters of users or add, edit, or delete user profiles.

The Authentication Dashboard

Clicking the Authentication tab opens the Authentication Dashboard. The pull-down menu lists all schools that have purchased Scholastic web-based programs (including Scholastic U, Expert 21, the ITS, Training Zone, and others). Click the pull-down menu, then click the school name to open the School View Screen for that school. The menu also lists the District Office; select this to manage district administrators.

Teacher	Dennis	Baumann	dbaumann	dbaumann@riverdale.k12.wi.us	dbaumann_ID	Enabled	

Authentication Dashboard

What is the Authentication Dashboard?

The Authentication Dashboard allows you to view important information about Scholastic Web-based products and services associated with your school, including Scholastic U, the Interactive Teaching System, the Training Zone, and Expert 21. If your school has a SAM Server that is registered to SAM Connect, you may also use the Authentication Dashboard to view the profiles of teachers and administrators who have access to your Scholastic Web-based products and services. If your school does not have a SAM Server that is registered to SAM Connect, you can use the Authentication Dashboard to add, edit, and delete teacher and administrator profiles.

What are the Available Products and Services?

Your available products and services are any Scholastic Web-based products and services purchased by your school or district.

What is an Authentication User Profile?

The Authentication User Profiles table displays a list of individual users who have access to the Scholastic Web-based products and services associated with your school.

Clicking a school on the pull-down menu opens the School View Screen. The School View Screen contains two tables:

- Available Products and Services:** This table shows the web-based programs purchased by the district as clickable links. Click the links to open the login screen for that program.
- Authentication User Profiles:** This table shows the profiles of the school's Authentication users (those users who have been enrolled in the school's web-based programs). If the selected school has a registered SAM server, the users will be teachers and administrators present on the SAM server associated with the school. The table will be read only since user profiles are edited in SAM. If the school has a nonregistered SAM account, then the table will have live links to add new user profiles, import rosters, edit user profiles, and delete user profiles.

Importing Rosters

QUINCY SCHOOL DISTRICT

Authentication User Roster Import

Importing a roster will add and/or modify the list of active authentication users for your school. To import a roster, you will need a comma-separated value (.csv) file. For each authentication user that you import, the following fields are required:

FIRST_NAME: Enter the user's first name.
LAST_NAME: Enter the user's last name.
USERNAME: Enter a username.
PASSWORD: Enter a password. Passwords must contain between 6 and 16 characters, and cannot be only the user's first or last name or a combination of the two. Passwords must also contain at least one numeral.
EMAIL: Enter a valid email.
USER_ROLE: Enter "1" for teacher. Enter "2" for school administrator. Enter "3" for school technical administrator. To add district administrator, return to the school management screen on the Authentication Dashboard and select District Office from the drop down menu.

[Download a sample CSV Roster Template](#)

After you complete your roster import, you will have an opportunity to review the authentication user profiles and edit or delete any users. You will also be required to fix any errors resulting from incorrect formatting of your CSV file.

Please note that the combination of the user's USERNAME, FIRST_NAME, and LAST_NAME is used as the key identifier when importing. If a record in the import file contains a USERNAME, FIRST_NAME, and LAST_NAME that matches an existing authentication user profile, that profile will be updated. USERNAMEs are case sensitive for this purpose only.

To select the files that you want to import, type the name of the file or use the Browse button to locate the correct file. Then click "Import CSV File".

Select CSV file: no file selected

Scholastic recommends registering district servers with SAM Connect. Rosters from registered SAM servers are automatically imported into SAM Connect and are updated to reflect any changes. Administrators of SAM Connect accounts without registered servers may import a roster of users from a CSV file. To import a roster, select the school from the pull-down menu and click the **Import Roster** link to open the Roster Import Screen.

The CSV file should contain the following fields for each user at the school level:

- **First Name:** The user's first name
- **Last Name:** The user's last name
- **Username:** The user's username
- **Password:** Passwords must be 8 to 16 characters, one of which must be a numeral, and not use the user's first or last name or a combination of the two
- **Email Address:** The user's email address
- **User Role:** Enter "1" for teachers, "2" for school administrator, or "3" for technical administrator. To add a district administrator, return to the dashboard and select **District Office** from the pull-down menu
- **District User ID:** The unique user ID associated with each user in the district

Click **Download a sample CSV Roster Template** to view a sample of a correctly formatted CSV roster file.

Once the CSV roster file is correctly formatted, click **Browse** to select the file for importing. When the correct file is displayed in the Select CSV File window, click **Import CSV File** to import the file. To stop and restart the process, click **Cancel**. When the CSV file is imported successfully, the User Roster Confirmation Screen appears, displaying a list of all user profiles in the CSV roster file.

SCHOLASTIC
QUINCY SCHOOL DISTRICT

Home Licensing Updates Admins Service Dates School Match Authentication

QUINCY SCHOOL DISTRICT

Roster Confirmation
The CSV file has been imported.
You may edit or delete any user profiles by clicking on the options in the Actions column.

FIRST_NAME	LAST_NAME	USERNAME	PASSWORD	EMAIL	ROLE	DISTRICT_USER_ID	ACTIONS
Sarah	Greene	sgreene	W3lcome	sgreene@quincy.org	District Administrator		Edit Delete

Please note the above marked errors, fix the errors by editing or deleting the users, then submit roster.

From the User Roster Confirmation Screen, administrators may edit or delete user profiles. When all user profiles are displayed correctly, click **Submit Roster**.

If the imported roster contains formatting errors, an error message appears at the bottom of the User Roster Confirmation Screen. Use the **Edit** link to correct the highlighted errors, then click **Submit Roster** again. Click **Cancel** to cancel the import.

Each teacher profile in the district that uses Scholastic's web-based programs must have a unique username. If two or more teacher profiles have the same username, these accounts are temporarily disabled until the usernames are modified, either through the roster tab of SAM if the server is registered, or through the edit function of the Authentication Dashboard.

When the roster is successfully imported, all users appear on the School View Screen.

Adding Users

ADD NEW USER PROFILE

**required*

*First Name:

*Last Name:

*User Role:

*Email Address:

*Username:

*Password:

*Retype Password:

District User ID:

Passwords must contain between 6 and 16 characters and cannot be only the user's first or last name or a combination of the two. Passwords must also contain at least one numeral.

Administrators from districts with registered SAM servers do not need to add users or update the user list in SAM Connect. Changes made to user profiles in SAM will be automatically updated in SAM Connect. See [Getting Started With Scholastic Achievement Manager](#) for more information. In these districts the user list appears as read only.

Administrators of SAM Connect accounts without registered servers can add users through the School View Screen. To add a new user, click **Add New User Profile** from the School View Screen to open the Add New User Profile window.

Fill in the fields, choose the user's role from the pull-down menu (administrator or teacher), then click **Save** to save the user profile in SAM Connect. The user's profile appears on the user profile list. Click **Cancel** to return to the School View Screen.

Editing Users

EDIT USER PROFILE

*required

*First Name:

*Last Name:

*User Role:

*Email Address:

*Username:

*Password:

*Retype Password:

District User ID:

Passwords must contain between 6 and 16 characters and cannot be only the user's first or last name or a combination of the two. Passwords must also contain at least one numeral.

Administrators from districts with registered SAM servers do not need to edit user profiles in SAM Connect. Changes made to user profiles in SAM will be automatically updated in SAM Connect. See [Getting Started With Scholastic Achievement Manager](#) for more information. In these districts the user list appears as read only.

Administrators of SAM Connect accounts without registered servers can edit user information through the School View Screen. To edit a user profile, click the **Edit** link next to the profile on the School View Screen to open the Edit User Profile window.

Edit the fields, choose a user's role from the pull-down menu if one has not been selected, then click **Save** to save the edited user profile in SAM Connect. The edited profile appears on the user profile list. Click **Cancel** to return to the School View Screen.

Deleting Users

DELETE USER PROFILE

The following user will be deleted:

First Name: Sarah
 Last Name: Greene
 Username: sgreene
 Email: sgreene@quincy.org
 Role: Teacher
 District User ID:

Administrators from districts with registered SAM servers do not need to delete users in SAM Connect. Changes made to user profiles in SAM will be automatically updated in SAM Connect. See [Getting Started With Scholastic Achievement Manager](#) for more information. In these districts the user list appears as read only.

Administrators of SAM Connect accounts without registered servers can delete users through the School View Screen. To delete a user profile, click the **Delete** link next to the profile on the School View Screen to open the Delete User Profile window.

Review the profile, then click **Delete** to delete the user profile in SAM Connect and return to the School View Screen. The deleted profile should not appear on the user profile list. Click **Cancel** to return to the School View Screen.
